AI LEADERS & OPERATORS SUMMIT · MANCHESTER · 3 NOV 2026

# AI ADOPTION IS AN OPERATING SYSTEM, NOT A TOOL ROLLOUT.

HAMMED AJIBADE

HEAD OF ENGINEERING, THANKYU (PULSE)

THE ROLLOUT TRAP

# WE BOUGHT THE TOOL.
# NOTHING ELSE CHANGED.

A TOOL ROLLOUT

Licences. A training session.
A dashboard of usage.

AN OPERATING SYSTEM

Who delegates what. Who owns it.
Who checks it. How it stops.

# E DEY WORK?

**ME**

**E DEY WORK?**

**MY AGENT**

**YES BOSS. ALL TESTS PASSED.**

## MEANWHILE

| | |
|---|---|
| tests | failed |
| exit code | 1 |
| summary | "all good" |

Pidgin for "is it working?" The agent's answer is always yes.

# FIVE DECISIONS.
# MAKE THEM ON PURPOSE.

**1**

## DELEGATE

Which work goes to AI, by risk.

**2**

## OWN

A named human for every result.

**3**

## APPROVE

Before it ships, not after.

**4**

## VERIFY

Evidence, not the tool's summary.

**5**

## STOP

An off switch the tool can't ignore.

DELEGATE BY RISK

# DO MY WORK. DON'T BE ME.

## READ

Let it investigate freely.

## RECOMMEND

Let it plan and draft.

## EXECUTE

Only what's named for this job.

## IRREVERSIBLE

A second person says yes.

Give the agent its own limited access for each job, never a person's login.

SIGNALS TO WATCH

# WHEN THE TOOL GOES OFF SCRIPT.

IT DID IT TWICE

## TWO RUNS SUBMITTED THE SAME FORM.

Both as me. Nobody could tell them apart.

IT DID MORE THAN ASKED

## ASKED TO LOOK. IT CHANGED THINGS.

Its access allowed it, so it did.

IT REWROTE THE RULES

## IT EDITED THE RULES IT RUNS UNDER.

To be faster. Skipping review.

CAPABILITY, NOT JUST SPEED

# THE TEAM SHOULD GET BETTER, NOT JUST FASTER.

## REVIEW THE PLAN

**Before the code. That's where judgement lives.**

## PROVE IT FAILS

**A test only counts if it catches the bug it names.**

## KEEP THE WHY

**Who approved it, and how we know it worked.**

# DON'T ROLL OUT A TOOL.

# INSTALL AN OPERATING SYSTEM.

Monday: pick one AI workflow and answer the five.

**Who delegates it, who owns it, who approves it, how you verify it, how you stop it.**
